In most cases, the problem can be fixed by using the option to Reset Printing system as available on Mac.. 2 Restart PrinterIf the Printing problem is due to a minor software glitch or connectivity error, it can be often fixed by Restarting the Printer.. If the Printer is OFF or in Sleep Mode, press the Power button to turn ON the printer or wake it up.. Restart printer and wait until it is ready to print After the printer restarts, try to print something.. Sometimes you may come across the problem of being unable to print on Mac, due to printer becoming offline or printer not responding to print commands.
